

```
// src/components/Hero.jsx

import React from "react";

export default function Hero({ title, subtitle, background }) {
  return (
    <section
      className="hero text-white text-center d-flex flex-column justify-content-center"
      style={{
        background: `url(${background}) no-repeat center center/cover`,
        padding: "80px 20px",
      }}
    >
      <h1>{title}</h1>
      <p>{subtitle}</p>
    </section>
  );
}
```
